

Spectra Pro *Cocoa Cracker*

Dedicated to perform

Spectra Pro Cocoa Cracker

The ideal machine for cocoa processing and nut butter processing and other multipurpose grinding needs.

Spectra Cracker is an awesome tool to crack roasted cocoa beans as well as raw ones. It is important to get this step right to effectively and efficiently winnow the husk, and get nibs of correct size to add to the Spectra melanger.

It is a simple machine to maintain, and the rollers are all made of high quality stainless steel, and so also the hopper. It is bearing mounted to give you years of smooth service unlike some in the market which use bushes. The machine can be easily disassembled and reassembled.

You can use it either on the enclosed stand, or choose to mount on your own table.
