SPECTRA MIKRO WINNOWER

Includes Patented and Patent Pending features. Product may differ slightly from the picture above.

The ideal machine for cocoa processing from bean to bar.

A relatively inexpensive but powerful solution for cocoa and other seed winnowing is the new "MIKRO WINNOWER". The need for efficiently winnowing the husk and dust from the nibs is an essential and key process. The newly developed

model. Is small and compact and created with new chocolatiers in mind speed, and at the same time also allows for the unit to be used worldwide by simply hooking it up to a home or shop vacuum cleaner.

Multiple control points in the feeder, suction and the flow system allow you to control the degree of separation of the husk from the nibs easily and finely. One or two passes can produce a 99% separation easily.

All food contact parts are in food grade 304 stainless steel or food grade plastic. Fine dust collection, adjustable rubber padded legs, compact in size, easy to fit in a small workplace, robust support all together provide a full package that can be shipped worldwide. Above all, easy to operate. Designed to connect to most home and shop vacuum cleaners.

This amazing “WINNOWER” is the perfect companion to your Bean to Bar endeavors, separates the dust from the nibs in a very precise manner. We have made several key enhancements to the winnower to make it perfect for Chocolate lovers.
