

Pre Grinder

- To make quick work of grinding small quantities of foods including nut pastes, cocoa powder, brewing cocoa and PRE-GRINDING nibs into a coarse paste for reducing refining time, beans, soaked rice, fruits and any foods both wet and dry. The machine can handle volumes as small as a table spoon to a cup or two. Stainless steel jars with Stainless steel blades dispatch of any materials that you can think of. Of course, it even has an option blender that you can use as a regular juice blender and as a general food processor. The strong 650 W motor is ideal to grind down nibs into smaller powder that can be added directly into the melanger.
-
